

## Fastest change, by the power of the word - The "magic" formulas, in theory and practice ...

The practical application of the method presented here is very simple. Whether you apply the formulas loudly, semi-verbally, or only in thought, that is left to your personal feeling. Think of each formula as a battery or rechargeable battery, which must be charged first in order to achieve its optimum effect. And with a small amount of time per day, already very much can be achieved.

Decisive for the effects is the formula time. This can be somewhat different in each case and depends on the ability to concentrate, or personal circumstances.

An approximate policy is 8-10 minutes for a formula (two-letter combination). Approximately 15 minutes for a triple formula (three letters) and 20-25 minutes for a four-way formula. (Four letters)

The formula activator has been developed for an enormous reduction in these (necessary) loading times. This crystal is available in various shapes and sizes.

However, everyone is able to convince themselves immediately and completely free of efficacy and simplicity. **The letters are intoned analogously to the German alphabet, as they are pronounced.** The letter Y corresponds to the Ü!

The letters which are relevant for the formula work are:

A = aaa

B = bee

C = Tsee

D = Dee

E = Eee
